NUSCIENTA

NuScienta Youth · AI Explorers

Illustrative sample. Real reports are written for each learner.

END-OF-PROGRAM REPORT

For the parent or guardian of the learner named below. It shows what they can now do, with evidence from their own work, not just what they completed.

LEARNER	AGE BAND	COHORT	FACILITATOR
Maya (sample)	**11 to 13**	**Founding North America, Jan to Mar 2027**	**Named in real reports**

CERTIFICATE
Earned: every quiz passed at 70% or above, all eight labs and the capstone submitted

NEXT STEP
Ready for AI Thinkers

WHAT THEY CAN DO NOW

HABIT	LEVEL	EVIDENCE FROM THEIR WORK
Judging what AI tells them	**Strong**	Week 7 lab: caught a confident false claim (the Great Wall is visible from space) and named the NASA source that disproved it.
Deciding when AI belongs	**Secure**	Opened every lab with "AI or not?" and chose not to use AI in two of eight, with a reason each time.
Creating with AI, credit included	**Developing**	Labeled AI help in six of eight labs. The week 7 image lab credited the tool but not the prompt she used.

WHAT THEY COMPLETED

8 OF 8
Quizzes passed, average 86%

8 OF 8
Labs, each with written feedback

7 OF 8
Live classes attended

CAPSTONE · WEEK 8

FakeCheck: spotting fake school-closure messages

Problem: Fake "school's closed" texts spread every winter.
Data it would need: Real past messages from the school, and known fakes.
Who it could harm: Families who miss a real closure if it flags one by mistake.

> **Facilitator's evaluation:** Meets the capstone standard. Strongest on who it could harm. Next: test the false-alarm plan on real messages.

FACILITATOR'S NOTE

Maya asks the question most learners skip: "how do you know?" Her week 6 lab traced why a photo filter worked worse on darker skin, with three examples as evidence.

PRACTICE NEXT

- Asking where a confident answer came from before using it.
- Saying which part of a piece of work came from AI, every time.

HOW TO READ THE LEVELS

Developing: shows the habit with prompting. **Secure:** shows it on their own most of the time. **Strong:** shows it unprompted, and can explain why it matters.
